

BUILD YOUR DECK WITH DECK PRO®

Deck Pro® makes it possible to achieve a subtle and smooth finish without any visible screws. The tool helps you install the decking screw diagonally from the edge of the board so that the screw is hidden.

1 Adjust distance

Set the desired distance between the boards, from 3-7.5 mm

2 Customize width

Fits decking boards from 85 mm to 150 mm in width

3 Place on the board

Squeeze the handle, place and release for the tool to grip the board

4 Ready to mount!

The tool works as a helping hand when mounting the screw

SCREWS AND MATERIAL

The Deck Pro® screw has the dimension 4.5x60 mm and is available in outdoor and stainless.

OUTDOOR

TX 15

4,5x60

High-quality surface treatment in C4-class with high quality steel that ensures long durability.

STAINLESS A4

TX 15

4,5x60

FASTENERS

DECK PRO®

Your tool for hidden decking installation.

With Deck Pro®, you can easily achieve a professional and barefoot-friendly result without any visible screws!

NKT
FASTENERS

DECK PRO®

UNIQUE ADJUSTMENT FUNCTION

The only tool on the market that fits all common decking board sizes from 85 mm to 150 mm.

ROBUST AND STABLE

Strong construction that stands steady on the board. Thoroughly tested to withstand minimum 100 kg of direct pressure - try it and you will feel the difference!

EASY TO WORK WITH

The screw bites quickly and the included bits automatically stop at the correct depth. Adjustable spacers help you determine the correct distance between the boards.

UNIQUE SYSTEM SOLUTION

With a Deck Pro® tool from NKT Fasteners, one tool is enough to cover all widths. Adjust the distance between the boards easily with supplied spacers. An extra bit is also included.

Don't forget that the Deck Pro® screw also fits most other decking tools on the market.

Adjustable for all common board widths

85 mm

- **150 mm**
